

COMPANY PROFILE

Full-home custom cabinetry

Designed in Chengdu.
Delivered by a team that
lives here.

MUSE DESIGN GOLD AWARD · HCA INTERNATIONAL DESIGN
AWARD

11,000 SQ FT GALLERY · SETIA ALAM, SELANGOR

Three things, done properly.

Every project includes design consultation, space planning and material selection. We quote from your layout — never a fixed rate per square foot.

Built-in cabinetry

Kitchens, wardrobes, storage — planned around how the room is actually used.

PHOTO NEEDED

No real shot of this yet —
see the nine-shot list

Wall panels

Panelling that carries the same board and finish as the cabinetry, so nothing reads as an add-on.

PHOTO NEEDED

No real shot of this yet —
see the nine-shot list

Hidden doors

Doors that disappear into the wall line — detailed and installed by the same team.

So you know where you stand, before either of us spends more time.

Starting prices at our base A-series specification — solid-wood melamine, PUR edge banding, Blum runners, Salice hinges.

PER SPACE

Kitchen incl. island from RM 18,500

Master wardrobe from RM 12,800

Bedroom wardrobe each from RM 9,800

Wet kitchen from RM 8,800

Entryway shoe cabinet from RM 5,400

TV console from RM 3,900

ALL IN

RM 16,000

per space, for most projects.

Count the spaces you'd like done and multiply — that is a fair first figure. Heavily specified homes go higher.

WHAT MOVES IT

Mostly one thing: how much cabinetry goes into each space. The same master bedroom with a 5 m² wardrobe versus a 20 m² one differs by more than three times.

INSIDE EVERY FIGURE

Design consultation, space planning, site measurement

Detailed drawings, materials and hardware, factory inspection

Installation by our own team, and after-sales

List prices. Sintered stone tops are quoted separately. Any promotion running at the time is applied on top.

— PROJECT 01 · SKELETON LINE

Open shelving that had to line up with the ceiling grid, to the millimetre.

[board grade]

INVESTMENT

RM [range]

“[one line in the client's own words]”

— PROJECT 02 · MISTY MOUNTAIN

A kitchen the family cooks in
every day, not one that
photographs well once.

Four sign-offs between your drawing and your handover.

Production starts only after you have signed the detailed drawings. The project closes only after you have checked the installation against the handover list. Every payment sits behind something you already approved.

01

Site measurement

Measured on site, not taken from the developer's plan.

02

Drawing sign-off

You approve the detailed drawing before anything is cut.

03

Pre-delivery inspection

Checked before it leaves the factory. It does not ship if it fails.

04

Installation QC

Our own installation team, checked against the handover list.

MATERIAL

ENF / F☆☆☆☆ board with PUR edge banding — the strictest formaldehyde-emission classes under the Chinese and Japanese standards. Test reports available on request.

RECOGNITION

MUSE Design Gold Award · HCA International High-End Customized Home Design Award · Best Booth Design, ARCHIDEX Malaysia

— COME AND SEE

The material decides it. Photographs never do.

Handle the board, close a drawer, look at a colour under real light. Ten minutes in the gallery tells you more than any quotation. Visits are by appointment, so the time is yours.
